

Cisco.Actualtests.640-461.v2014-01-31.by.NANCY.255q

Number: 640-461
Passing Score: 800
Time Limit: 120 min
File Version: 12.5

<http://www.gratisexam.com/>

Exam Code: 640-461

**Exam Name: Introducing Cisco Voice and Unified Communications Administration
v8.0**

Exam A

QUESTION 1

Which two fields are required parameters when manually creating users on Cisco Unity Connection with predefined templates? (Choose two.)

- A. Username (alias)
- B. Extension
- C. First name and last name
- D. Employee ID
- E. Title

Correct Answer: AB

Section: (none)

Explanation

Explanation/Reference:

Explanation: following items need to be configured when creating new user from predefined template: User Template Type (extension), Based on Template, Alias, Display Name, Mailbox Store, Outgoing Fax Server, Phone System, Generate SMTP Proxy Address From Corporate Email Address (Cisco Unity Connection 8.5 and Later only)

http://www.cisco.com/en/US/docs/voice_ip_comm/connection/8x/gui_reference/guide/8xcucgrg030.html#wp1521731

QUESTION 2

Users report that all external callers are leaving urgent voice-mail messages. Where can this behavior be changed?

- A. Under the Phone Menu Configuration > Unidentified Callers Message Urgency
- B. Under the Opening Greeting > Unidentified Callers Message Urgency
- C. Under the Message Settings > Unidentified Callers Message Urgency
- D. Under the System Call Handlers > Unidentified Callers Message Urgency
- E. Under the Voice-mail Box Settings > Unidentified Callers Message Urgency

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation: message urgency indicates the action that Cisco Unity Connection allows when a message has been left by an unidentified caller or by a user who has not explicitly signed in.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/connection/8x/gui_reference/guide/8xcucgrg010.html#wp1051385

QUESTION 3

Which tools allow the administrator to migrate users from Cisco Unity to Cisco Unity Connection?

- A. Cisco Object Backup and Restore Application Suite
- B. Cisco Disaster Recovery Framework Tool
- C. Cisco Real Time Monitoring Tool
- D. Cisco Unity Serviceability Tool

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation: To migrate messages and data from Cisco Unity 4.0(5) or later to Connection 8.x, we recommend that you use the Cisco Unified Backup and Restore Application Suite (COBRAS) instead of the Migrate Messages and Migrate Users utilities.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/connection/8x/administration/guide/8xcucsag030.html#wp1053312

QUESTION 4

When creating a Cisco Unity Connection user template, which element should you configure to automatically play a "This department is closed" message at specific hours?

- A. greeting schedule
- B. extension greetings
- C. schedule
- D. active schedule

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 5

Which three options are valid for creating users in Cisco Unity Connection? (Choose three.)

- A. manual creation
- B. bulk using *.csv file
- C. bulk using enterprise parameters
- D. Cisco Unity Connection Serviceability
- E. automatic creation through TUI by users dialing into voice mail
- F. import through Active Directory

Correct Answer: ABF

Section: (none)

Explanation

Explanation/Reference:

Explanation: Cisco Unity Connection Serviceability, a web-based troubleshooting tool for Cisco Unity Connection.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/connection/2x/serviceability/cuc_administration/guide/2xcucservag010.html

QUESTION 6

Which statement about Cisco Unity Connection user templates is true?

- A. Changes in user templates affect only new users to be created.
- B. Changes in user templates affect only existing users.
- C. Changes in user templates affect new and existing users.
- D. Changes in user templates have no impact on users unless those users are imported through Active Directory.

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation: changes to the template will not affect any currently existing user accounts that were based on the template when they were created. Changes to a user template affect only those accounts that are created subsequent to the changes.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/connection/1x/user_mac/guide/mac060.html

<http://www.gratisexam.com/>

QUESTION 7

Users report that when they press the Messages button on their phones, they often get a busy tone. Which option can rectify this issue?

- A. Disable the Callers Can Edit Messages checkbox under the Message settings
- B. The CSS for the phones does not contain the voice-mail port partitions
- C. The CSS for the phone does not contain the voice-mail pilot partition.
- D. Precede all Cisco Unity Connection greetings to announce that each message is limited to 90 seconds long to free up voice-mail ports.

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 8

Which three rules are valid transfer rules in Cisco Unity Connection? (Choose Three)

- A. Standard
- B. alternate
- C. closed
- D. holiday
- E. nonstandard

Correct Answer: ABC

Section: (none)

Explanation

Explanation/Reference:

Explanation:

Standard Transfer Rule

This transfer rule applies during the work hours that your Cisco Unity administrator specified for your organization, or in other situations when no other transfer rule is enabled. By design, the standard transfer rule cannot be disabled.

Alternate Transfer Rule

Enable this transfer rule to apply during a specific time period when you want to override the other transfer rules. For example, you may want to route all your calls directly to voice mail while you are out of the office or you may want to transfer your calls to a different extension if you are temporarily working from another location. As long as it is enabled, the alternate transfer rule overrides all other transfer rules.

Closed Transfer Rule

Enable this transfer rule if you want Cisco Unity to perform different transfer actions during the nonwork hours that your Cisco Unity administrator specified for your organization. (For example, you may want to route all your calls directly to voice mail during nonwork hours.) As long as it is enabled, the closed transfer rule overrides the standard transfer rule during nonbusiness hours.

http://www.cisco.com/en/US/docs/voice_ip_comm/unity/5x/user/guide/assistant/ex/cuugasste070.html

QUESTION 9

Which Cisco Unity Connection report provides a summary view of the current size, last error condition, and status of the mailbox store?

- A. Users
- B. Message Traffic
- C. Mailbox Store
- D. System Configuration

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 10

By default, how many failed attempts at signing into Cisco Unity Connection is a user allowed before their account is locked out?

- A. 2
- B. 3
- C. 4
- D. 5
- E. 6
- F. no limit

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 11

To monitor the service health and performance, which service should you activate in Cisco Unity Connection?

- A. CUC Performance Service
- B. CUC System Auditing
- C. Real-Time Monitoring Tool
- D. Cisco Serviceability Reporter

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation:

Topic 2, CUCM

QUESTION 12

An administrator is attempting to add a new user in Cisco Unified Communications Manager Administration but does not see the option to add a new user. What is the most likely cause of this issue?

- A. The SQL User database is not running.
- B. The system is synchronized with an LDAP server.
- C. BAT is not enabled.
- D. The administrator has the aceno user adda rights box checked.
- E. The SIP Realm is not defined in User Management.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: If you enable LDAP synchronization in Cisco Unified Communications Manager Administration, you thereby configure your system to use the LDAP corporate directory as the end user directory for Cisco Unified Communications Manager. In this scenario, you cannot add or delete users in Cisco Unified Communications Manager Administration. You add and remove end users in the corporate LDAP directory.

http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/admin/8_6_1/ccmcfg/b02ldsyp.html

QUESTION 13

An administrator wants to locate and remove all unassigned directory numbers on the Cisco Unified Communications Manager system. Which method is the best method to accomplish this task?

- A. Choose Device > Phone. Search all phones and remove the undesired directory numbers.
- B. Use the Dial Plan Installer to remove the directory numbers.
- C. Use the Disaster Recovery System to restore only valid directory numbers.
- D. Choose Call Routing > Route Plan Report, choose the Unassigned DN drop-down menu, and then remove all orphaned directory numbers.
- E. Choose Device > Device Settings > Device Defaults and use the wizard to locate and remove the orphaned directory numbers.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation: A. Assigned phone could be deleted from device>phone option. E. Device defaults are used to updating devices.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/admin/8_5_1/ccmcfg/b03rtrep.html#wp10_24696

QUESTION 14

Which utility should you use when you need to add a large number of users into Cisco Unified Communications Manager?

- A. Cisco Unified User Administration
- B. Application User CAPF Profile
- C. Cisco Unified Communications Manager Bulk Administration Tool
- D. Cisco Unified Telephony User Administration

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation:

The Cisco Unified Communications Manager Bulk Administration Tool (BAT), a web-based application, performs bulk transactions to the Cisco Unified Communications Manager database. BAT lets you add, update, or delete a large number of similar phones, users, or ports at the same time. When you use Cisco Unified Communications Manager Administration, each database transaction requires an individual manual operation, while BAT automates the process and achieves faster add, update, and delete operations.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/bat/7_1_2/t01batow.html

QUESTION 15

Which type of user in Cisco Unified Communications Manager has an interactive login?

- A. administrator
- B. end user
- C. application user
- D. phone user

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:

End users -- End users are associated with an individual and have an interactive login. End users can have administrative roles based on the user group role configuration.

Application users -- Application users are associated with applications such as Cisco Unified Attendant Console, Cisco Unified Contact Center Express (UCCX), or Cisco Unified Manager Assistant. The mentioned applications need to authenticate with CUCM, but application users do not have the ability to interactively log in. Application users are leveraged for internal process-level communications between applications.

Link:

http://www.cisco.com/en/US/products/sw/voicesw/ps556/products_configuration_example09186a0080b3dd05.shtml

QUESTION 16

When implementing a plan of action, what should you do?

- A. Make all of the changes at once to minimize the impact to users.
- B. Limit the impact of the changes to users.
- C. Completely remove access lists to ensure that they will not impact the changes.
- D. Even if a change adversely affects the users, keep moving forward with the plan of action.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:
make all of the change at once is not good decision.

QUESTION 17

The screenshot displays the 'Phone Configuration' page. At the top left is a 'Save' button. Below it is the 'Status' section, which shows an information icon and the text 'Status: Ready'. The 'Phone Type' section contains 'Product Type: Cisco Unified Client Services Framework' and 'Device Protocol: SIP'. The 'Device Information' section includes a checked box for 'Device is trusted', and several fields: 'Device Name*' (text input), 'Description' (text input), 'Device Pool*' (dropdown menu with 'Default' selected), 'Common Device Configuration' (dropdown menu with '< None >' selected), 'Phone Button Template*' (dropdown menu with '-- Not Selected --' selected), 'Common Phone Profile*' (dropdown menu with 'Standard Common Phone Profile' selected), and 'Calling Search Space' (dropdown menu with '< None >' selected). A large 'Actual Tests' watermark is visible across the center of the screenshot.

Refer to the exhibit. Where can the phone menu be accessed from?

- A. from the individual users or user templates
- B. from the Class of Service configuration screen
- C. from the user contacts
- D. from the Interview Handler configuration screen
- E. from the Message Store configuration screen

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation: Cisco Unity Connection offers several versions of the phone conversation that users hear and use. The version you select determines whether Connection responds only to phone keypad input or also uses voice recognition to interpret spoken commands Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/connection/7x/user_mac/guide/7xcucmac040.html#wp1273985

QUESTION 18

A user in Cisco Unified Communications Manager Administration has been added to the Standard CCM Admin

Users group, which includes the Standard CCMADMIN Administration role, but the user cannot add new users.

What is the cause of this issue?

- A. The add user capability has been disabled for the group
- B. The incorrect group and role were assigned.
- C. The add user capability has been disabled for the role.
- D. Only theCCMAdmin user can add users.
- E. Users can be added only via LDAP

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation:

The Standard CCM Admin Users role includes no permissions beyond logging into Cisco Unified Communications Manager Administration. The administrator must add another authorization role to define the parts of the Cisco Unified Communications Manager Administration that the user can administer.

The Standard CCMADMIN Administration role allows a user to access and make changes in all of Cisco Unified Communications Manager Administration.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucmbe/admin/8_6_1/ccmsys/a02mla.html

QUESTION 19

A new phone has been added to the Cisco Unified Communications Manager server. The phone display shows Your Current Options, but when the New Call softkey is pressed, no dial tone is heard and the call cannot be placed. What could be the cause of this issue?

- A. An incorrect MAC address has been entered for the new phone.
- B. No directory number has been assigned to a line.
- C. The end user is not associated with the device.
- D. No calling search space has been configured on the line.
- E. An incorrect device pool has been configured on the phone.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:

A Cisco Unified CME system uses the following basic building blocks:

- Ephone or voice register pool - A software concept that usually represents a physical telephone, although it is also used to represent a port that connects to a voice-mail system, and provides the ability to configure a physical phone using Cisco IOS software. Each phone can have multiple extensions associated with it and a single extension can be assigned to multiple phones. Maximum number of ephones and voice register pools supported in a Cisco Unified CME system is equal to the maximum number of physical phones that can be connected to the system.
- Directory number - A software concept that represents the line that connects a voice channel to a phone. A directory number represents a virtual voice port in the Cisco Unified CME system, so the maximum number of directory numbers supported in Cisco Unified CME is the maximum number of simultaneous call connections that can occur. This concept is different from the maximum number of physical lines in a traditional telephony system.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucme/admin/configuration/guide/cmeover.html

QUESTION 20

What Cisco client application allows administrators to interact with performance monitoring counters to assist in determining the overall health of the Cisco Unified Communications Manager server?

- A. Cisco Unified Communications Manager Administration
- B. Cisco Unified Real-Time Monitoring Tool
- C. Cisco Unified OS Administration
- D. CAR Tool
- E. BAT Tool

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: Cisco Unified Communications Manager Administration Guide provides instructions for administering the Cisco Unified Communications Manager. Cisco Unified Communications Operating System Administration allows you to configure and manage the Cisco Unified Communications Operating System. CAR denotes to CDR analysis and reporting tool, The Cisco Unified Communications Manager Bulk Administration Tool (BAT), a web-based application, performs bulk transactions to the Cisco Unified Communications Manager database. BAT lets you add.

QUESTION 21

Which report can be generated by using the User Reports feature of the CAR tool?

- A. Traffic
- B. Top N
- C. Malicious Call Details
- D. CDR Error
- E. FAC/CMC

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: Users, managers, and CAR administrators can generate user reports. CAR includes the following user reports: Bills, Top N, FAC/CMCC, CDR error and malicious call details are system report.

Link: http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/service/8_6_1/car/carustop.html

QUESTION 22

In which two locations can an end user configure their Call Forward All settings? (Choose two.)

- A. Cisco Unified Serviceability
- B. Cisco Unified Communications Manager User Options Interface
- C. Directly on the Cisco Unified IP phone
- D. Cisco Unified Communications Manager Administration
- E. Cisco Unified User Serviceability

Correct Answer: BC

Section: (none)

Explanation

Explanation/Reference:

Explanation: Cisco Unified Serviceability, a web-based troubleshooting tool. Cisco unified communication manager administration comprise all the features.

Link:

http://www.cisco.com/en/US/docs/telepresence/cucm_cts/cucm_cts_admin_book/guide/cucm_cts_admin_phonefeat.html

QUESTION 23

What is the quickest way to test the Cisco Unified Communications Manager configuration part of MWI to see if MWI On and MWI Off is working?

- A. Dial into Cisco Unity Connection from an IP phone. Enter the MWI On numbers, then enter the MWI Off numbers.
- B. Call a voice-mail user and ask them if their MWI light is on, and then disconnect the call. Call the user back and ask if the MWI light is off.
- C. In Unity Connection, issue the MWI Flash command to turn all MWI lights on, then off.
- D. If MWI numbers are dialable from an IP phone, dial the MWI On number. If the light comes on, then dial the MWI Off number to see if the light goes off.
- E. MWI cannot be tested directly from the Cisco Unified Communications Manager or an IP phone.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation: Link:

http://www.cisco.com/en/US/products/sw/voicesw/ps2237/products_tech_note09186a0080711ae3.shtml

QUESTION 24

An administrator wants to see how long a specific IP phone extension is in use during a given period of time. What CAR tool feature would the administrator use?

- A. System Reports > Traffic > Summary by Phone Number
- B. CDR > Search > By Call Precedence Level
- C. Device Reports > Route Patterns/Hunt Groups > Route and Line Group Utilization
- D. User Reports > Top N > By Duration

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation: Only CAR administrators generate the Traffic Summary by Phone Number report. The report provides information about the call volume for a period and set of phone numbers that you specify.

Link: http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/service/8_6_1/car/carsytra.html

QUESTION 25

In Cisco Unified Communications Manager Native Presence, what two things is a watcher monitoring in real time? (Choose two.)

- A. Registration status of a specific IP phone
- B. Registration status of the hunt group
- C. Registration status of the MGCP gateway
- D. Registration status of Cisco Extension Mobility of the IP phone
- E. Status of a registered directory number

Correct Answer: AE

Section: (none)

Explanation

Explanation/Reference:

Explanation:

When you configure Presence in Cisco Unified Communications Manager Administration, an interested party, known as a watcher, can monitor the real-time status of a directory number or SIP URI, a presence entity, from the device of the watcher.

Cisco Unified Communications Manager controls which destinations a watcher can monitor with presence groups. A presence group contains watchers and the destinations that can be monitored by the watchers in the group. To allow watchers in one group to monitor directory numbers in other groups, you specify permission settings to allow or block (disallow) the presence request. Presence authorization works with the presence groups that are configured to ensure that a watcher has permission to monitor the status of a destination.

After you configure the presence groups, you apply a presence group to the following items in Cisco Unified Communications Manager Administration:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/admin/7_1_2/ccmcfg/b02prgrp.html

QUESTION 26

Which protocol is used for communication between Cisco Unity Express and Cisco Unified Communications Manager Express?

- A. H.323
- B. G.711
- C. MGCP
- D. Q.931
- E. SIP

Correct Answer: E

Section: (none)

Explanation

Explanation/Reference:

Explanation: Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/unity_exp/rel8_5/install/prereq.html#wp1112818

QUESTION 27

What is the Cisco Unified Communications Manager implementation of one-way intercom referred to as?

- A. One-Way Intercom monitor
- B. Whisper Intercom
- C. Secure Intercom
- D. Silent monitor

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: Whisper intercom means that only one-way audio exists from the caller to the called party. The called party must manually press a key to talk to the caller Link: http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/admin/8_6_1/ccmfeat/fsintrcm.html

QUESTION 28

In which scenario is it possible to have the same directory number configured on two different lines or phones and not be a shared line?

- A. directory number assigned to different partitions
- B. directory number assigned to the same partition
- C. directory number assigned to different calling search spaces
- D. directory number assigned to the same calling search space

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation: You can set up one or more lines with a shared-line appearance. A Cisco Unified Communications Manager system considers a directory number to be a shared line if it appears on more than one device in the same partition.

Link:

http://cisco.biz/en/US/docs/voice_ip_comm/cucmbc/admin/8_6_1/ccmsys/a03dn.html#wp1100362

QUESTION 29

Which web-based tool is used to access Cisco Unified Communications Manager CDR Analysis and Reporting?

- A. Cisco Unified CDR Administration
- B. Cisco Unified CM Administration
- C. Cisco Unified Reporting
- D. Cisco Unified Serviceability

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 30

Which level of users in Cisco Unified Communications Manager CDR Analysis and Reporting can generate reports for quality of service?

- A. administrators
- B. managers
- C. auditors
- D. individual users

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 31

When performing backups within Cisco Unified Communications Manager, which component stores backups on a remote SFTP server?

- A. Local Agent
- B. Master Agent
- C. Scheduler
- D. Backup Controller

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 32

To obtain CDR information, which application is used?

- A. Cisco Unified Communications Manager Administration
- B. Cisco Unified Serviceability
- C. Cisco Unified Operating System Administration
- D. Disaster Recovery System
- E. Cisco Unified Communications Manager Call Detail Record Analysis and Reporting tool
- F. Cisco Unified Reporting

Correct Answer: E

Section: (none)

Explanation

Explanation/Reference:

Explanation: Cisco Unified Serviceability, a web-based troubleshooting tool, The Cisco Unified Communications Manager Administration Guide provides instructions for administering the Cisco Unified Communications Manager. CAR generates reports for Quality of Service, traffic, and billing information.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/service/6_0_1/car/carovrvw.html#wp1101

QUESTION 33

What will happen if an end user is deleted from the Cisco Unified Communications Manager system?

- A. The user will be removed, but the associated device and directory number will remain in the system.
- B. The user and the associated device will be removed, but the directory number will become orphaned.
- C. The user, the associated device, and the directory number will be removed.
- D. The user will be removed, and the associated device and directory number will be automatically assigned to the administrator.
- E. The user will be removed, and the associated device and directory number will be allocated to the next user added to the system.

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 34

In which situation are user PINs maintained by the local Cisco Unified Communications servers?

- A. Only when the system is using LDAP synchronization.

- B. Only when the system is using LDAP authentication.
- C. Only when the system is using Global Directory.
- D. PINs are always maintained by the local Cisco Unified Communications Manager servers
- E. PINs are never maintained by the local Cisco Unified Communications Manager servers.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation: Cisco Unified Communications Manager assigns the system Default Credential Policy to end user passwords, end user PINS, and application user passwords Link: http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace_Release_8.0_-_Configuring_Cisco_Unified_MeetingPlace_Directory_Service#Configuring_the_User_PIN_in_Cisco_Unified_Communications_Manager

QUESTION 35

Which command is used to determine if an MGCP gateway is registered with a Cisco Unified Communications Manager server?

- A. show gateway status
- B. show isdn q931
- C. show ccm-manager
- D. show isdn status
- E. show isdn q921

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation:

Router# show ccm-manager

MGCP Domain Name: router.cisco.com

Total number of hosts: 2

Priority Status Host

=====

Primary Registered 10.0.0.201

First backup Backup polling 10.0.0.50

Second backup Undefined

Current active Communications Manager: 10.0.0.201

Current backup Communications Manager: 10.0.0.50

Redundant link port: 2428

Failover Interval: 30 seconds

Keepalive Interval: 15 seconds

Last keepalive sent: 00:20:18 (elapsed time: 00:00:06) Last MGCP traffic time: 00:20:18 (elapsed time:

00:00:06) Last switchover time: None

Switchback mode: Immediate

Link: http://www.cisco.com/en/US/docs/ios/12_3/vvf_c/interop/intcnf1.html#wp1027388

QUESTION 36

Which two directory services are supported by Cisco Unified Communications Manager for Lightweight Directory Access Protocol integration? (Choose two.)

- A. Windows Active Directory 2008
- B. Novell eDirectory
- C. iPlanet Directory Server 4.0
- D. Sun ONE Directory Server
- E. Open Lightweight Directory Access Protocol 2.1

Correct Answer: AD

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 37

Which statement accurately describes a calling search space?

- A. a group of object with similar reach ability characteristics.
- B. a calling feature that finds mobile users.
- C. a toll that is used to track calls to certain numbers.
- D. a feature that defines which partitions are reachable from a device.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation: http://www.tech-recipes.com/rx/703/cisco_callmanager_partition_and_calling_search_spaces_css_explained/

QUESTION 38

An engineer is configuring a new Cisco Unified Communications Manager server. However, when the engineer tries to register the IP phones, the registrations are unsuccessful. When the engineer checks one of the phones, there is no status that is shown along with the Cisco Unified Communications Manager server IP address.

What is the probable cause?

- A. The server connection is established, but the information is encrypted.
- B. There is no current connection with the Cisco Unified Communications Manager server.
- C. The Cisco Unified Communications Manager server is currently available.
- D. The currently receiving call-processing services are running on the phone.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 39

Which option should you use in the Cisco Unified Communications Manager End Users Configuration page to ensure that a user can use a desk phone both for calls and for Cisco Unified Presence?

- A. Enable Cisco Unified Presence Communicator
- B. Allow Control of Device from Cisco Computer Telephony Integration

- C. Allow Cisco Unified Personal Communicator Integration
- D. Allow Cisco Unified Presence Control over IP Phone

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 40

Which report in Cisco Unified Reporting should you use to track the number of users with one or more phones?

- A. Unified CM User Device Count
- B. Unified CM Device Distribution Summary
- C. Unified CM Table Count Summary
- D. Unified CM Data Summary

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 41

Which two types of device can the Cisco Unified Disaster Recovery use as a backup target? (Choose two.)

- A. DVD RAM drive
- B. FTP server
- C. tape device
- D. TFTP server
- E. WebDAV server
- F. SFTP server
- G. CD RAM

Correct Answer: CF

Section: (none)

Explanation

Explanation/Reference:

Explanation: Cisco unified disaster recovery choose one of the following backup devices. Tape Device--Stores the backup file on a locally attached tape drive Network Directory--Stores the backup file on a networked drive that is accessed through an SFTP connection

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/drs/7_0_1/DRS_CUCM/drsag701.html#w p195093

QUESTION 42

Which report can you use to display all currently unassigned directory numbers?

- A. Route Plan Report
- B. Directory Number Assignment
- C. Unassigned Objects Report
- D. IP Phone Number Assignment

Correct Answer: A

Section: (none)

Explanation

Topic 3, CUCME

QUESTION 43

Which call processing agent is based on Cisco IOS software and works with ISR platforms?

- A. Cisco Unified Presence Server
- B. Cisco Unity Connection
- C. Cisco Unified Communications Manager Express
- D. Cisco Unified Communications Manager
- E. Cisco Unified Contact Center Express

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation: Cisco unified presence server, unity connection, communication manager and contact center express requires appliance based system based on Cisco media convergence server (MCS), UCS (unified computing system) or VMware.

QUESTION 44

When you configure a shared extension in Cisco Configuration Professional, which two characteristics should be the same on both phones, so that the phones can successfully use a shared extension? (Choose two.)

- A. monitor mode
- B. MAC address
- C. ephone-dn
- D. number
- E. user ID

Correct Answer: CD

Section: (none)

Explanation

Explanation/Reference:

Explanation:

You can set up one or more lines with a shared-line appearance. A Cisco CallManager system considers a directory number to be a shared line if it appears on more than one device in the same partition. For example, if directory number 9600 on phone A is in the partition called Dallas and on phone B in the partition called Texas, that directory number does not represent a shared-line appearance. (Ensure the directory number 9600 for phone A and phone B are in the same partition; for example, Dallas.)

In a shared-line appearance, for example, you can set up a shared line, so a directory number appears on line 1 of a manager phone and also on line 2 of an assistant phone. Another example of a shared line involves a single incoming 800 number that is set up to appear as line 2 on every sales representative phone in an office.

You can also choose to update a directory number and have the updates apply to all devices that share the directory number.

The following information provides tips about and lists the restrictions for using shared-line appearances with Cisco CallManager.

Shared Line Tips

Use the following tips when configuring shared lines:

- You create a shared-line appearance by assigning the same directory number and route partition to different devices.
- If multiple devices share a line, each device name displays in the Associated Devices pane of the directory number in the Directory Number Configuration window in Cisco CallManager Administration.
- If you change the Calling Search Space or Call Forward and Pickup settings on any device that uses the shared line, the changes apply to all devices that use that shared line.
- To stop sharing a line appearance on a device, change the directory number or partition name for the line and update the directory number in the Directory Number Configuration window in Cisco CallManager Administration.
- In the case of a shared-line appearance, Remove From Device removes the directory number on the current device only and does not affect other devices.
- Most devices with a shared-line appearance can make or receive new calls or resume held calls at the same time. Incoming calls display on all devices that share a line, and anyone can answer the call. Only one call remains active at a time on a device.

QUESTION 45

After changes are made to an IP phone, which reset method is the fastest to bring the phone back into service?

- A. drop
- B. restart
- C. reset
- D. shutdown
- E. shut and no shut

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: restart- Performs a fast reboot of the specified phone or all phones running SCCP associated with this Cisco Unified CME router. Does not contact the DHCP server for updated information

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucme/admin/configuration/guide/cmreset.html#wpxref87974

QUESTION 46

What component does Cisco Unified Communications Manager Express use to match outbound dial peers?

- A. destination pattern
- B. incoming called-number
- C. calling number ANI
- D. answer-address
- E. port or session target

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation: When a router receives a voice call, it selects an outbound dial peer by comparing the called number (the full E.164 telephone number) in the call information with the number configured as the destination pattern for the POTS dial peer Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucme/admin/configuration/guide/cmedialp.html

QUESTION 47

What is the correct URL to use to add a user to Cisco Unified Communications Manager Express?

- A. <http://ipaddress/cucme.html>
- B. <https://ipaddress/cue.html>
- C. <http://www.ipaddress/cme.html>
- D. <http://ipaddress/ccme.html>
- E. <http://ipaddress/cme.html>

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation: ccme cisco call manager express

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucme/admin/configuration/guide/cmegui.html#wp1069477

QUESTION 48

Which protocol should you use to securely access Cisco Configuration Professional?

- A. HTTPS
- B. Telnet
- C. SCP
- D. TLS

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 49

Which type of ephone-dn is typically used for intercoms and paging?

- A. dual-line
- B. multiline
- C. single-line
- D. special-line

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 50

A phone is configured with an ephone-dn number of A100. Which CLI command is used in ephone-dn configuration mode to enable the Intercom feature to dial this phone?

- A. intercom extension A100

- B. intercom number A100
- C. intercom A100 enable
- D. intercom A100

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 51

Which configuration must be configured on the Cisco Unified Communications Manager Express router prior to Graphical Administration?

A.

```
ip http server

telephony-service
web admin system name admin password cisco
dn-webedit
time-webedit
```

B.

```
ip http server
ip http path flash:path

telephony-service
web admin system name admin password cisco
dn-webedit
time-webedit
```

C.

```
ip https server
ip https path flash:path

telephony-service
web admin system name admin password cisco
dn-webedit
time-webedit
```

D.

```
ip http server
ip http path flash:path

telephony-service
dn-webedit
time-webedit
```

- A. Exhibit A
- B. Exhibit B
- C. Exhibit C
- D. Exhibit D

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: To enable the HTTP server, and specify the path to files for the GUI and a method of user authentication for security, perform the following steps. The HTTP server on a router is disabled by default.

SUMMARY STEPS

1. enable
2. configure terminal
3. ip http server
4. ip http path flash.
5. ip http authentication {aaa | enable | local | tacacs}
6. exit

To enable the HTTP server, and specify the path to files for the GUI and a method of user authentication for security, perform the following steps. The HTTP server on a router is disabled by default.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucme/admin/configuration/guide/cmegui.html

QUESTION 52

Which device would allow you to place calls from a Cisco Unified Communications Manager that is configured with SCCP phones to a Cisco Unified Communications Manager Express that is configured with SIP phones?

- A. gatekeeper
- B. gateway
- C. H.323 trunk
- D. SIP trunk
- E. Cisco Unified Border Element

Correct Answer: E

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 53

Which Cisco IOS command should you use to view the configuration of voice dial peer 911?

- A. show dialplan dialpeer 911
- B. show dialplan number 911
- C. show dial-peer voice 911
- D. show event-manager consumers 911

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 54

How does the Cisco Unified Communications Manager Express match an outbound VoIP dial peer?

- A. Outbound dial-peer matching uses the entire string of digits en bloc to match the dial peer with the longest match.
- B. Outbound dial-peer matching is completed on a digit-by-digit basis.
- C. It matches outbound dial peers by placing all the dial peers into a hunt group and then uses the entire dialed

number en bloc to match the first dial peer.

- D. Cisco Unified Communications Manager Express creates a hunt group that contains all the configured dial peers and then applies the dial digits in a digit-by-digit manner to match a dial peer.

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation: When a router receives a voice call, it selects an outbound dial peer by comparing the called number (the full E.164 telephone number) in the call information with the number configured as the destination pattern for the POTS dial peer. The router then strips out the left-justified numbers corresponding to the destination pattern matching the called number. If you have configured a prefix, the prefix will be put in front of the remaining numbers, creating a dial string, which the router will then dial. If all numbers in the destination pattern are stripped-out, the user will receive (depending on the attached equipment) a dial tone.

QUESTION 55

Which Cisco IOS CLI command should you use to perform an IP phone cold reboot?

- A. `router(config-ephone)#reset`
- B. `router(config-ephone)#restart`
- C. `router(config-ephone-dn)#restart`
- D. `router(config-phone)#reset`

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 56

An organization is using a centralized DHCP server for all IP phones. However, when the IP phones are powered up, the phones are unable to obtain an IP address. Which CLI command should be in the router configuration to ensure that the IP phones are able to reach the DHCP server?

- A. `router(config)#helper-address`
- B. `router(config-if)#ip helper-address`
- C. `router(config-if)#helper-address`
- D. `router(config)#ip helper-address`

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:

Topic 4, IP Phone

QUESTION 57

When troubleshooting a phone that is unable to get an IP address from a DHCP server, what is the first thing to check for on the phone?

- A. Make sure that DHCP Enabled is disabled on the phone.
- B. Make sure that the phone is getting the proper VLAN information.

- C. Make sure that the TFTP server address is correct on the phone.
- D. Make sure that the DHCP scope has enough addresses left in the range.
- E. Make sure the phone has the correct phone load ID.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: IP phones rely on a TFTP-based process to acquire configuration files, software images, and other endpoint-specific information. The Cisco TFTP service is a file serving system that can run on one or more Unified CM servers.

Link: http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/srnd/8x/netstruc.html#wp1185040

QUESTION 58

After an IP phone has been added to a Cisco Unified Communications Manager server, the administrator notices that the phone has a directory number that is not in the number range in use by the organization. He also notes that the directory number is 1000. What is the most likely cause?

- A. The phone number was misconfigured.
- B. The phone may have auto-registered.
- C. The phone is configured on another server.
- D. DHCP gave the phone the wrong directory number
- E. TFTP server is misconfigured

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: Organizations have multiple server which work as a single cluster.

Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucme/admin/configuration/guide/cmehbasic.html#wp1013086

QUESTION 59

All users report that when they press the Messages button on their IP phone, nothing happens. What is the most likely cause of this issue?

- A. Cisco Unity Connection is not configured.
- B. The default Voicemail Profile does not have a Pilot number configured.
- C. The Voicemail Pilot does not have the VoiceMail Profile configured.
- D. The Integrated Service Engine is offline.
- E. The Voicemail Pilot is incorrect.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: The voice-mail pilot number specifies the directory number that you dial to access your voice messages. Cisco Unified Communications Manager automatically dials the voice- messaging number when you press the messages button on your phone. Each voice-mail pilot number can belong to a different voice-messaging system Link:

http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/admin/6_0_1/ccmsys/a06vmccm.html#wp_1043604

QUESTION 60

When adding an IP phone to a Cisco Unified Communications Manager system, what two choices does an administrator have to add the phone to the system? (Choose two.)

- A. auto-registration
- B. FHSS provisioning
- C. IP phone configuration assistant
- D. manual provisioning
- E. Cisco Unified Serviceability

Correct Answer: AD

Section: (none)

Explanation

Explanation/Reference:

Explanation: You can automatically add phones that support either SCCP or SIP to the Cisco Unified Communications Manager database by using autoregistration, manually by using the phone configuration windows, or in groups with the Bulk Administration Tool (BAT). If you do not use autoregistration, you must manually add phones to the Cisco Unified Communications Manager database.

Link:

QUESTION 61

On an IP phone line appearance, for which two purposes is the Display parameter designed to be used? (Choose two.)

- A. display a number other than the directory number of the IP phone
- B. display a name instead of the directory number of the IP phone
- C. internal caller ID
- D. external caller ID
- E. full directory number ID for outgoing calls

Correct Answer: BC

Section: (none)

Explanation

Explanation/Reference:

Explanation: Link:

http://cisco.biz/en/US/docs/voice_ip_comm/cucmbe/admin/8_6_1/ccmsys/a03dn.html#wp1100362

QUESTION 62

Which user parameter is used as a password when connecting through the telephony user interface?

- A. PIN
- B. Passphrase
- C. PassKey
- D. Key ID

Correct Answer: A

Section: (none)

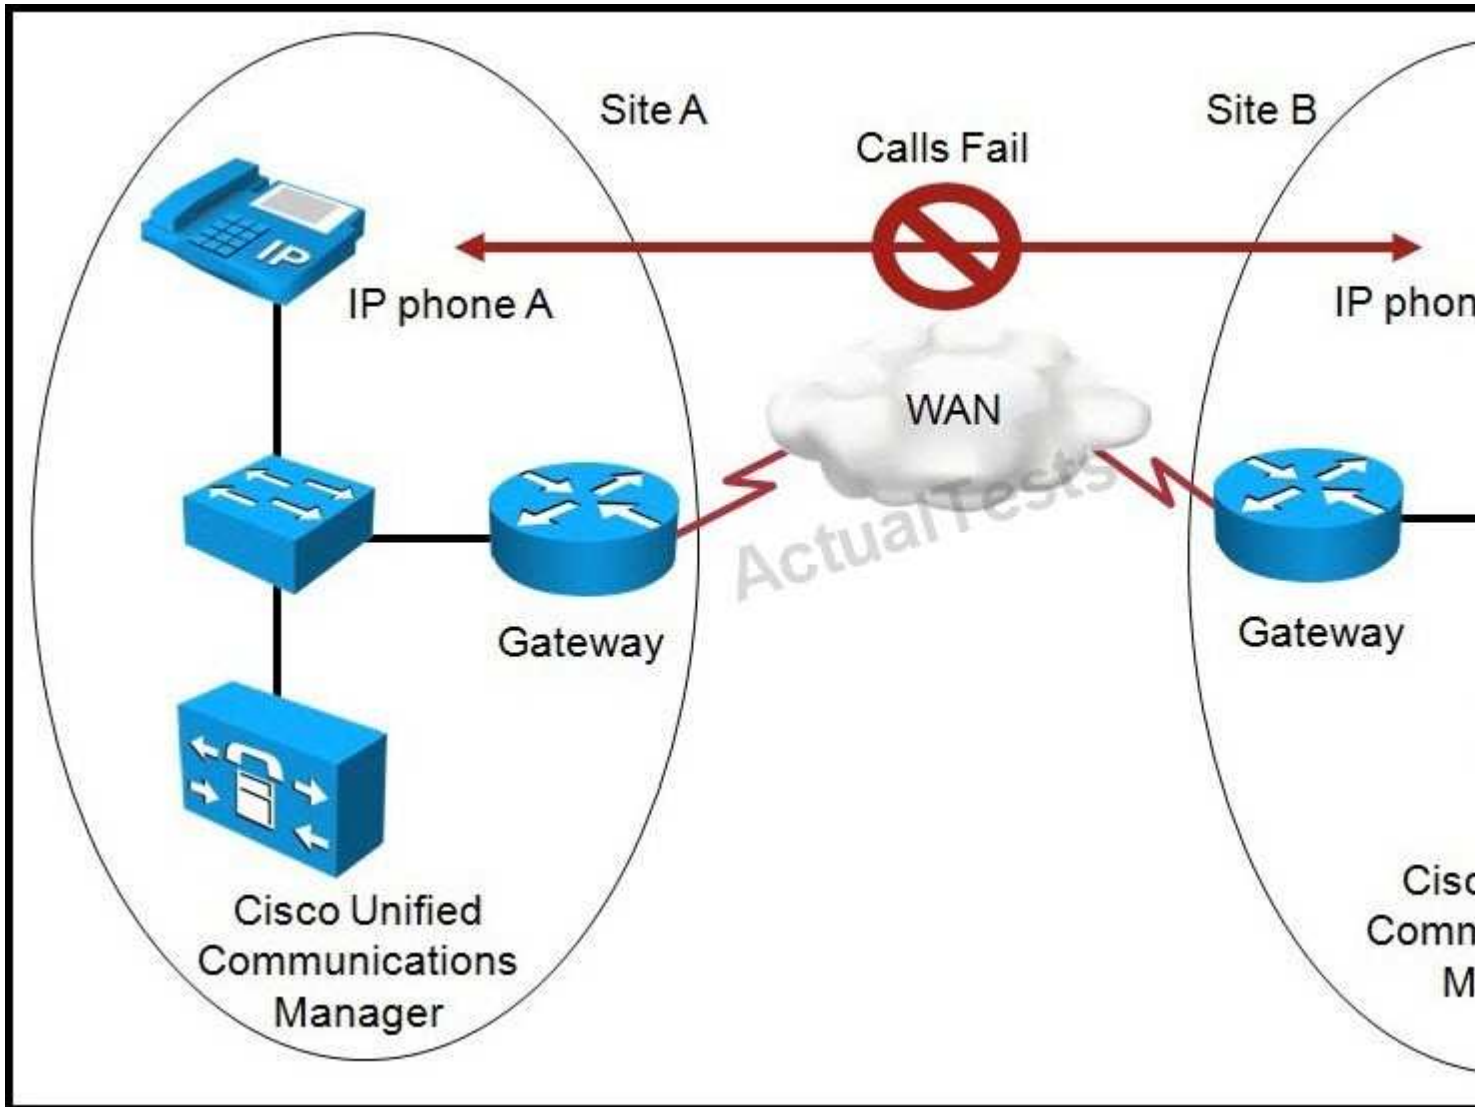

Explanation

Explanation/Reference:

QUESTION 64

Can an IP phone be configured so that calls to that IP phone can be rerouted if the IP phone become unregistered?

- A. Yes, configuring call forward All provides this coverage
- B. No, if a phone is unregistered, the re-order tone is played to the caller
- C. Yes, configuring Call Forward Busy Internal provides this coverage
- D. Yes, configuring Call Forward Unregistered provides this coverage
- E. No. the call is dropped at the gateway

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 65

An administrator is attempting to add a new IP phone to the network. The phone does not register and continues to cycle through the registration process. The administration checks and notices that the IP address assigned to the phone is not correct network. What is the cause of this issue?

- A. The TFTP server is reconfigured
- B. The DHCP server is giving out false IP addresses
- C. The Cisco Unified Communication Manager is down
- D. The switch port that the phone is connected to is configured with the wrong voice LAN
- E. The PSTN gateway is down

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 66

In which two ways can an administrator reset an IP phone that is registered with Cisco Unified Communications Manager? (Choose two.)

- A. Phone can be reset in Cisco Unified Communications Manager Administration.
- B. Phone can be reset in the Cisco Unified Communications Manager Express CLI.
- C. Press the * * # * * key combination on the IP phone keypad.
- D. Enter the reset ephone command in the switch.
- E. Press the * * #* key combination on the IP phone keypad.
- F. Press the ##**# key combination on the IP phone keypad.

Correct Answer: AC

Section: (none)

Explanation

QUESTION 67

Which type of server is used to deliver the configuration to an IP phone?

- A. TFTP
- B. DHCP
- C. FTP
- D. Cisco Discovery Protocol

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 68

An IP phone has a line calling search space and a device calling search space. If a call is made from the IP phone, which calling search space is used?

- A. Neither calling search space is used.
- B. The line calling search space takes precedence and is used.
- C. The device calling search space takes precedence and is used.
- D. The line and device calling search spaces are combined and the line calling search space has precedence.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation: If you configure a calling search space both on an IP phone line and on the device (IP phone) itself, Cisco Unified Communications Manager concatenates the two calling search spaces and places the line calling search space in front of the device calling search space Link: http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/admin/8_0_2/ccmsys/a03ptcss.html

QUESTION 69

A user exists within an office of IP phones, all of which have the same pickup group. A call comes into a phone of another office worker who is currently at lunch. What should the user do to have the call redirected to his or her phone?

- A. Press the "Pickup" softkey and then the line that is ringing.
- B. Press the "Call Pickup" softkey only.
- C. Press the "Call Pickup" softkey and then the line that is ringing.
- D. Press the "Pickup" softkey only.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

reference:http://www.odessa.edu/phonehelp/7960/7960_pickup.htm

QUESTION 70

If two phones share a line between them, what happens if the user of the first phone is using the line and the user of the second phone uses the Barge feature?

- A. The user of the first phone is notified of the Barge request.
- B. A three-way conference begins.
- C. The call is discontinued, but the first phone user and the second phone user are able to talk.
- D. The user on the first phone is knocked off the line, and the second phone user takes over the line.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 71

When you reset an IP phone via the Cisco Unified Communications Manager Administration page, which method briefly shuts down a registered phone and brings it back up?

- A. drop
- B. restart
- C. reset
- D. shutdown
- E. shut and no shut

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 72

An engineer is installing an IP phone in a remote location. When the engineer plugs the IP phone into the network, the phone does not power up. What is the first thing that should be checked?

- A. Power over Ethernet switch
- B. Cisco Unified Communications Manager Server
- C. Cisco Unified Presence
- D. DHCP server

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

Explanation:

Topic 5, Qos

QUESTION 73

Which issue does CAS signaling on a T1 circuit create?

- A. Signaling bits are subtracted from each frame, which causes a significant loss of voice quality.
- B. An extra signaling bit is added to the sixth frame to carry signaling information.
- C. A signaling bit is subtracted from every sixth frame to carry signaling information.
- D. Signaling bits are added to the signaling stream to create extended super frames.

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation: Each T1 channel carries a sequence of frames. These frames consist of 192 bits and an additional bit designated as the framing bit, for a total of 193 bits per frame. Super Frame (SF) groups twelve of these 193 bit frames together and designates the framing bits of the even numbered frames as signaling bits. CAS looks specifically at every sixth frame for the timeslot's or channel's associated signaling information

QUESTION 74

Which description describes the weighted fair queuing algorithm?

- A. Empty queue 1. If queue 1 is empty, empty queue 2, then empty queue 3, unless a packet for a higher queue arrives.
- B. An administrator defines the traffic classes based on match criteria, including protocols, access control lists, and input interfaces.
- C. A flow-based algorithm that simultaneously schedules interactive traffic to the front of a queue to reduce response time and fairly shares the remaining bandwidth among high-bandwidth flows.
- D. This feature brings strict priority queuing to CBWFQ.
- E. Packets are placed into a single queue and serviced in the order they were received.

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation: WFQ allocates an equal share of the bandwidth to each flow. Flow-based WFQ is also called fair queuing because all flows are equally weighted. Link: http://www.cisco.com/en/US/docs/ios/12_0/qos/configuration/guide/qcwfq.html

QUESTION 75

What is a benefit of using FRF.12 in a Frame Relay network?

- A. provides a Layer 3 mechanism for reducing latency in the network
- B. fragments packets into equal sizes to reduce fixed-network delay
- C. reduces delay and jitter by expediting the transfer of smaller frames through the hardware transmit queue
- D. eliminates the need for prioritization of delay-sensitive traffic

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 76

Which type of single switch port can support data and voice VLANs and is recommended for Cisco Unified IP phones?

- A. multiflex port
- B. trunk port
- C. access port

D. ISL trunking port

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation: A port on a Cisco switch is either an access port or a trunk port. Access ports belong to a single VLAN and do not provide any identifying marks on the frames that are passed between switches

QUESTION 77

Refer to the exhibit.

```
HQ#sh isdn stat
Global ISDN Switchtype = primary-ni

%Q.931 is backhauled to CCM MANAGER 0x0003 on DSL 0. Layer 3 output may not apply

ISDN Serial0/0/0:23 interface
    ds1 0, interface ISDN switchtype = primary-ni
    L2 Protocol = Q.921 0x0000 L3 Protocol(s) = CCM MANAGER 0x0003
Layer 1 Status:
    ACTIVE
Layer 2 Status:
    TEI = 0, Ces = 1, SAPI = 0, State = TEI_ASSIGNED
Layer 3 Status:
    0 Active Layer 3 Call(s)
Active ds1 0 CCBs = 0
The Free Channel Mask: 0x807FFFFFFF
Number of L2 Discards = 0, L2 Session ID = 3
Total Allocated ISDN CCBs = 0
```

```
card type t1 0 0
enable password cisco
!
isdn switch-type primary-ni
!
controller T1 0/0/0
cablelength short 110
pri-group timeslots 1-24 service mgcp
!
interface Serial0/0/0:23
no ip address
encapsulation hdlc
isdn switch-type primary-ni
isdn incoming-voice voice
no cdp enable
!
```

Is this configuration correct and is the T1 operational? If not, what is the cause?

- A. Yes, the configuration is correct and it is operational.
- B. No, the configuration is incorrect and the T1 is not operational because MGCP is not the proper service statement.
- C. No, the configuration is incorrect and the T1 is not operational because, the isdn switch-type is incorrect.
- D. No, the configuration is incorrect and the T1 is not operational because the isdn-bind-13 ccm- manager command is missing from the serial0/0/0:23 interface.

E. No, the configuration is incorrect and the T1 is not operational because the no ip address command is applied to the serial0/0/0:23 interface.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation: To bind Layer 3 of the ISDN PRI interface of the Media Gateway Control Protocol (MGCP) voice gateway to the Cisco CallManager for PRI Q.931 signaling backhaul support, use the isdn bind-i3 ccm-manager command in interface configuration mode Link:

QUESTION 78

Which network component would cause variable network delay?

- A. dejitter buffer
- B. DSP delay
- C. processing delay
- D. serialization delay
- E. propagation delay

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 79

Which headers are compressed when cRTP is used?

- A. the UDP and RTP headers
- B. the IP header only
- C. the TCP header only
- D. the RTP header only
- E. the IP, UDP, RTP headers and the first byte of the payload
- F. the IP, UDP, and RTP headers

Correct Answer: F

Section: (none)

Explanation

Explanation/Reference:

Explanation: Compresses a header at various layers of the Open System Interconnection (OSI) reference model. Examples include Transmission Control Protocol (TCP) header compression, compressed RTP (cRTP), and compressed Internet Protocol/User Datagram Protocol (IP/UDP).

QUESTION 80

When generating QoS reports in the CAR tool, what two parameters are valid for report generation? (Choose

two.)

- A. route lists
- B. route patterns/hunt pilots
- C. route groups
- D. gateway types
- E. partitions
- F. IP phone directory numbers

Correct Answer: BD

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 81

Which three characteristics are associated with data? (Choose three.)

- A. Greedy
- B. TCP retransmits
- C. UDP priority
- D. delay sensitive
- E. drop insensitive
- F. benign
- G. benign or greedy.

Correct Answer: BEG

Section: (none)

Explanation

Explanation/Reference:

Explanation: Data traffic always acknowledge TCP packets for confirm delivery E2E. It is not drop sensitive because it's not real time traffic.

QUESTION 82

Which command is useful to see if network layer information is being received at a PSTN gateway?

- A. show gateway status
- B. show isdn q931
- C. show c cm-manager status
- D. show isdn status
- E. show isdn q921

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 83

What are the two differences between the IntServe and DiffServ models of QoS? (Choose two.)

- A. DiffServ provides absolute QoS guarantees.
- B. IntServ is the default QoS mechanism for all routers, because applications signal the router with the QoS level they require.
- C. DiffServ inherits the connection-oriented approach from telephony network design. Every individual communication must explicitly specify its traffic descriptor and requested resources to the network.
- D. With IntServ, packet delivery is guaranteed. However, the use of IntServ can severely limit the scalability of a network.
- E. DiffServ was designed to overcome the limitations of both the best-effort and IntServ models and can provide an "almost guaranteed" QoS.

Correct Answer: DE

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 84

Which three characteristics are associated with voice? (Choose three.)

- A. greedy
- B. TCP retransmits
- C. UDP priority
- D. delay sensitive
- E. drop insensitive
- F. benign
- G. benign or greedy

Correct Answer: CDF

QUESTION 87

Which description describes the low latency queuing algorithm?

- A. Empty queue 1. If queue 1 is empty, empty queue 2, then empty queue 3, unless a packet for a higher queue arrives.
- B. An administrator defines the traffic classes based on match criteria, including protocols, access control lists, and input interfaces.
- C. A flow-based algorithm that simultaneously schedules interactive traffic to the front of a queue to reduce response time and fairly shares the remaining bandwidth among high-bandwidth flows.
- D. This feature brings strict priority queuing to CBWFQ.
- E. Packets are placed into a single queue and serviced in the order they were received.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation: A & C denotes to weighted fair queue or DWFQ. B denotes to CBWFQ (class based weighted fair queue).

QUESTION 88

An engineer is troubleshooting call quality issues between central headquarters and a remote branch location. When on an active call, the engineer watches the call statistics on the IP phone and notices that the max jitter is 100 ms.

What is the maximum amount of jitter that the engineer should set to maintain a high-quality call?

- A. 5 ms
- B. 50 ms
- C. 10 ms
- D. 30 ms

Correct Answer: D

Section: (none)

Topic 6, Unified Personal Communicator

QUESTION 89

Refer to the exhibit.

Phone Type	
Product Type:	Cisco Unified Personal Communicator
Device Protocol:	SIP
Device Information	
⚠ Device is not trusted	
Device Name*	<input type="text"/>
Description	<input type="text"/>
Device Pool*	-- Not Selected --
Common Device Configuration	< None >
Phone Button Template*	-- Not Selected --
Common Phone Profile*	Standard Common Phone Profile
Calling Search Space	< None >
Media Resource Group List	< None >
User Hold MOH Audio Source	< None >
Network Hold MOH Audio Source	< None >

The exhibit shows a partial screen shot for a Cisco Unified Personal Communicator device. If the username that is associated with this device is jdoe, what should the devname be?

- A. The device name should be JDOEUPC.
- B. The device name should be UPCJDOE.
- C. The device name should be JDOE.
- D. The device name should be UPCCUPC.
- E. The device name should be UPCCSF.
- F. The device name has no naming convention.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation:

Refer to the exhibit: Product Type: Cisco Unified Personal Communicator Keep this in mind with respect to the version of CUPC in use:

1. If using CUPC version 8.0+, select Cisco Unified Client Services Framework as the Phone Type:

· CSF devices can be named anything you like; there isn't a naming convention, but there is a limit of 15 characters

(letters and numbers only).

2. If using CUPC version 7.0, select Cisco Unified Personal Communicator as the Phone Type. CUPC version 7.0 devices must follow a specific naming convention:

· The CUPC v7.0 device name must start with the letters "UPC," followed by a derivation of the username.

QUESTION 91

Refer to the exhibit.

What protocol is being used to send and receive instant messaging between the Cisco Unified Personal Communicator and Cisco Unified Presence?

- A. Enterprise Instant Messaging Protocol
- B. Extensible Messaging and Presence Protocol
- C. SIP
- D. SCCP
- E. CTI

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: Cisco Unified Presence consists of many components that enhance the value of a Cisco Unified Communications system. The main presence component of the solution is the Cisco Unified Presence server, which incorporates the Jabber Extensible Communications Platform and supports SIP/SIMPLE and Extensible Messaging and Presence Protocol (XMPP) for collecting information regarding a user's availability status and communications capabilities Link: http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/srnd/8x/presence.html

QUESTION 92

Which action must be taken for Cisco Unified Personal Communicator clients to access Cisco Unity Connection voice mail?

- A. Cisco Unity Connection must be integrated with LDAP.
- B. Cisco Unity Connection must be integrated with Cisco Unified Communications Manager using SIP integration.
- C. A Microsoft Exchange mailbox store must be configured in Cisco Unified Presence.
- D. IMAP must be enabled on Cisco Unity Connection for users that need to access voice mail through Cisco Unified Personal Communicator clients.
- E. Voice mail is automatically enabled for users who log in through Cisco Unified Personal Communicator clients.

Explanation:

QUESTION 102

Which two protocols are used by Cisco Unified Presence? (Choose two.)

- A. SIP/SIMPLE
- B. XMPP
- C. SCCP
- D. PPPoX
- E. IMPP

Correct Answer: AB

Section: (none)

Explanation

Explanation/Reference:

Explanation: The Skinny Call Control Protocol (SCCP, or short Skinny) is a proprietary network terminal control protocol. PPPoX (PPP over X) designates a family of encapsulating communications protocols implementing Point-to-Point Protocol.

Explanation:

QUESTION 114

Refer to the exhibit.

The screenshot shows a web interface titled "Change Password (Voice Mail)". At the top, there are navigation links: "User Template", "Edit", "Refresh", and "Help". Below this is a "Status" section with a red error icon and the message "Password does not have enough characters". Underneath is a "Choose Password" section with a dropdown menu currently showing "Voice Mail". A "Save" button is located below the dropdown. At the bottom, there are two input fields labeled "Voice Mail Password" and "Confirm Password".

The error message was displayed when the administrator attempted to set the default user password in the user template to four digits long. Which option can rectify this issue?

- A. The minimum password length in Cisco Unity Connection should be at least five digits long.
- B. The password length needs to be configured under the Authentication Rules settings using the Minimum Credential Length configuration field.
- C. The password length needs to be configured under the user template settings using the Minimum Credential Length configuration field.
- D. The password length cannot be adjusted under the user template; the password length can only be adjusted under the individual users.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

Explanation: A minimum length requirement (as set on the Edit Authentication Rule page, in the Minimum Credential Length field)

· Inclusion of at least one character from each of the following categories: upper-case letter, lower- case letter, number, and symbol (~ ! @ # \$ % ^ & * " ` , . : ; ? - _ () [] < > { } + = / \ |) · No characters repeated consecutively more than three times (for example, aaaaB1C9 is invalid) · No inclusion of the alias or name of the administrator

Explanation:

QUESTION 151

Refer to the exhibit.

The screenshot shows a user profile in Cisco Unity Connection. At the top, there is a 'Status' section with two messages: a warning icon followed by 'User has been deleted from the LDAP directory' and an information icon followed by 'Inactive User Imported from LDAP Directory'. Below this is a form with the following fields: 'Name' (empty), 'Alias*' (testldap1), 'First Name' (test), 'Last Name' (ldap1), 'Display Name' (test ldap1), 'SMTP Address' (testldap1@admin), and 'Initials' (empty). A large 'ActualTests' watermark is visible across the center of the form.

A user was imported to Cisco Unity Connection through LDAP integration. The user was later deleted from Active directory. What would happen to the user in Cisco Unity Connection?

- A. User would get purged immediately.
- B. User would be converted to a permanent Cisco Unity Connection legacy user in 24 hours.
- C. User would get purged in 24 hours.
- D. User would be converted to a permanent Cisco Unity Connection legacy user immediately.
