

**C2010-571.Examcollection.Premium.Exam.214q**

Number: C2010-571

Passing Score: 800

Time Limit: 120 min

File Version: 23.1

<http://www.gratisexam.com/>

**Exam Code: C2010-571**

**Exam Name: IBM Tivoli Process Automation Engine V7.5 Implementation**

## Exactquestions

### QUESTION 1

Which statement is true about asynchronous data validation?

- A. Data in a field is immediately validated when a user moves off of the field.
- B. Background validation is required to be active when a screen reader is being used.
- C. To be used, asynchronous data validation must be enabled for all fields of an application.
- D. To enable asynchronous data validation for all applications, add the statement ASYNCHRONOUS = 'Y' to the PRESENTATIONXML file.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### QUESTION 2

Where is Application Server security enabled?

- A. Security application
- B. Maximo.properties file
- C. Mxserver.properties file
- D. System Configuration application

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### QUESTION 3

How are the new settings for the log level refreshed and applied?

- A. Restart the Web server
- B. Log out completely and then log in again
- C. Log in as MAXADMIN and restart the log service
- D. Perform the Apply Settings action in the Logging application

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### QUESTION 4

What is the main purpose of a cron task?

- A. To set up the workflow clock
- B. To run scheduled jobs or tasks
- C. To synchronize the scheduled jobs with the current job plans
- D. To synchronize the Currency application with the Exchange Ratio variable

**Correct Answer:** B  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

**QUESTION 5**

What does the Reference Count field count in a conditional expression record?

- A. The number of conditional expressions used
- B. The number of versions for a specific expression
- C. The number of times the expression has been modified
- D. The number of times the condition is used throughout the system

**Correct Answer:** D  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

**QUESTION 6**

Which statement describes the usage of the Conditional Expression Manager?

- A. To set user database permissions
- B. To set organizational communication templates
- C. To set and control the generation of ad hoc reports
- D. To set and control access to fields, tabs, and applications

**Correct Answer:** D  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

**QUESTION 7**

How are Tivoli process automation engine (Tpae) languages installed?

<http://www.gratisexam.com/>

- A. Select languages during the Tpae installation
- B. Select languages during the maximo.ear build
- C. Select languages during the maximo.ear deployment
- D. Select languages during the Tpae language pack installation

**Correct Answer:** A

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 8**

Where is the attached documents location defined when using IBM WebSphere Application Server and IBM HTTP Server?

- A. web.xml file
- B. httpd.conf file
- C. plugin.conf file
- D. application.xml file

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 9**

Where can the mxs.db.fetchsize property be changed?

- A. Logging application
- B. Logging.properties file
- C. Mxserver.properties file
- D. System Properties application

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 10**

Which statement is true about the Database Configuration application admin mode?

- A. Cron task processing continues.
- B. There is no need to shut down the admin server.
- C. Event listeners continue to receive events but go into buffer-only mode.
- D. Users with the admin security role can continue to access system applications.

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 11**

How are long running SQL statements monitored?

- A. Set the SQL logger to LOG and review the output in the log file

- B. Set the Root logger to DEBUG and review the output in the log file
- C. Set the mxe.db.logSQLTimeLimit properties and review the output in the log file
- D. Set the mxe.db.fetchResultLogLimit properties and review the output in the log file

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 12**

What are three performance related properties? (Choose three.)

- A. mxe.mbocount
- B. mxe.db.SQLlog
- C. mxe.db.mboobject
- D. mxe.db.logResultSet
- E. mxe.db.logSQLTimeLimit
- F. mxe.db.fetchResultLogLimit

**Correct Answer:** AEF

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 13**

What task must be performed as part of initial data entry?

- A. Create Tool
- B. Create Craft
- C. Create Order
- D. Create Organization

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 14**

Which statement is true about appenders?

- A. Logging requests can be sent to multiple destinations.
- B. Logging requests cannot be sent to multiple destinations.
- C. Appenders can only be created by inserting their name into the log.properties file.
- D. Appenders cannot be deleted because they are managed by Tivoli process automation engine V7.5.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 15**

How can database performance be improved?

- A. turn off all cron tasks
- B. add triggers to support user queries
- C. add indexes to support user queries
- D. configure the database to allow nulls in all columns

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 16**

Which statement is true about Maximo applications and the Application Designer?

- A. The Application Designer is used to modify the layout of a user's Start Center.
- B. Every application has a presentation.xml file that contains all the information required to build the application's user interlace.
- C. When a user starts an application, the maxapplication.xml file is retrieved from the database and is placed in the memory of the application server.
- D. To preserve data integrally, all edits of application controls such as text boxes, buttons, and tabs should be done directly in the presentation.xml file.

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 17**

Where are General Ledger accounts created?

- A. Finance application
- B. Logging application
- C. Work Entry application
- D. Chart of Accounts application

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 18**

How is the Chart of Accounts application used?

- A. To create the links between the GL and the Organizations

- B. To create the General Ledgers (GL)for work order tracking
- C. To define the values for GL components for financial tracking
- D. To manage the user rights to access financial tracking options

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 19**

Where are workflow processes designed?

- A. Location application
- B. Properties application
- C. Workflow Designer application
- D. Work Order Tracking application

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 20**

Which option is available when setting password rules in the Security Controls action item?

- A. Delete excluded passwords
- B. Analyze existing passwords for strength
- C. Exclude the use of words from the data dictionary as passwords
- D. Send e-mails to users whose passwords are determined to violate new password rules

**Correct Answer: A**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 21**

Which statement describes how to enable Application Server security?

- A. Make a change to the mxserver.xml file and then rebuild and redeploy the EAR files.
- B. Enable it on the J2EE platform and use the Database Configuration application to set the value of UseAppServerSecurity to 1.
- C. Enable it on the J2EE platform. Tivoli process automation engine is capable or automatically recognizing the security setting.
- D. Make a change to the maximo properties file and two web.xml files, rebuild and redeploy the EAR files, and then enable it on the J2EE platform.

**Correct Answer: D**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 22**

Where is application access defined?

- A. Rights application
- B. Access application
- C. Security Groups application
- D. Application Definition application

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 23**

When using Migration Manager, collection restrictions for objects and attributes are migrated but which table is not?

- A. MAXOBJECTS
- B. COLLECTIONAUTH
- C. SECURIWRESTRICT
- D. MIGRATIONOBJECTS

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 24**

Which two options are valid target types for a Migration Manager package? (Choose two.)

- A. file
- B. URL
- C. database
- D. another environment
- E. database connection string

**Correct Answer: AC**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 25**

A user has created a new domain called EXIWOSTATUS and wants to migrate in to another environment. Which type and processing action of the Migration Manager package should be used?

- A. Type Exact; action Add
- B. Type Snapshot action Create
- C. Type Exact action AddChange
- D. Type Snapshot action AddChange

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 26**

Where are the Tivoli process automation engine properties defined?

- A. User Properties application
- B. Report Properties application
- C. System Properties application
- D. CronTaskProperties application

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 27**

Which statement is true about Start Center layouts?

- A. The Start Center column layouts that are available include Equal Width, Wide-Narrow, and Narrow- Wide.
- B. At any time1 the system administrator can make changes to the Start Center layout, but not the content, and push those changes out to all affected users.
- C. The administrator (or user with appropriate security privileges) can specify the number of Start Center portlet rows to accommodate specific computer monitors.
- D. Care must be taken when adding portlets to a Start Center template as the order in which the portlets are added becomes the order in which they are displayed on the Start Center.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 28**

By default, at which database level are the domains created?

- A. Set
- B. Site
- C. System
- D. Organization

**Correct Answer:** C

**Section:** (none)

## Explanation

### Explanation/Reference:

Explanation:

### QUESTION 29

What are the steps to configure the application import export functionality?

- A. Create the Object Structure, create the Publish Channel, configure an external system
- B. Create the Object Structure, create the Enterprise Service, configure an external system
- C. Create a Migration Manager package to import and export data, configure Security Group options
- D. Create the Object Structure, configure the supported applications, configure Security Group options

**Correct Answer:** D

**Section:** (none)

## Explanation

### Explanation/Reference:

Explanation:

### QUESTION 30

Which two protocols are available for defining an e-mail listener? (Choose two.)

- A. IMAP
- B. POP3
- C. SMTP
- D. GPRS
- E. SOAP

**Correct Answer:** AB

**Section:** (none)

## Explanation

### Explanation/Reference:

Explanation:

### QUESTION 31

Which two attributes are required to create a new message in the Bulletin Board application? (Choose two.)

- A. Site
- B. Subject
- C. Message
- D. Organization
- E. Expiration Date

**Correct Answer:** BE

**Section:** (none)

## Explanation

### Explanation/Reference:

Explanation:

### QUESTION 32

A company is about to implement an inbound Integration based on interface tables. When testing the integration, the developers noticed the data is not being properly imported to the database and they are able to

identify errors in the log files. How is the root cause of the problem identified?

- A. Review the xml code
- B. Recreate the Interface Tables from the External System application
- C. Verify the messages in the JMS queues and drop all error messages
- D. Use the Message Reprocessing application to review, modify, and reprocess the inbound messages

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### QUESTION 33

A customer has configured workflow process A to be auto-initiated after a new service request (SR) record is created. Which action automatically starts workflow process B as well as workflow process A after the new SR record is created?

- A. Create an action to start workflow process B after a new SR record is created.
- B. Create an escalation to start workflow process B after a new SR record is created.
- C. From the Selection Action menu, choose the Set Process to Auto-initiate option for the workflow process B.
- D. Configure the SR application to automatically start both workflow processes after a new SR record is created.

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### QUESTION 34

Which two statements are true about Interactions? (Choose two.)

- A. Interactions can be created and configured in the Create Interaction application.
- B. Interactions can be reviewed, modified, and deleted in the Interactions application.
- C. Interactions can be created and configured in the Web Services Library application.
- D. Interactions can be used to create and deploy Web services for inbound integrations.
- E. Interactions can be created, configured, modified, and deleted in the Interactions application.

**Correct Answer:** AB

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### QUESTION 35

A company has a requirement to create an inbound interface. During the design phase, the Integration developer was asked about the possibilities to integrate the product with an external system. What are three standard integration methods? (Choose three.)

- A. Data Loader
- B. Web Services

- C. FlatFile Import
- D. Interface Tables
- E. Database Inserts
- F. DB DUMP Import

**Correct Answer:** BCD

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 36**

When creating a Launch in Context entry, what also has to be created to make the entry available for user interface controls?

- A. Security Group
- B. Java Bean Class
- C. Signature Option
- D. Conditional User Interface

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 37**

Where are roles used?

- A. communication template, escalation, actions, e-mail listeners
- B. communication template, escalation, service level agreement, workflow
- C. communication template, notifications, service level agreement, workflow
- D. communication template, notifications, service level agreement, e-mail listeners

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 38**

A person record is stored in the database at which level?

- A. Set
- B. Site
- C. System
- D. Organization

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 39**

Which statement is true about a labor record?

- A. Labor records are used for tracking labor information.
- B. Outside labor must reference a valid labor rate contract.
- C. A labor record must reference a single craft/skill level combination.
- D. The Overtime Refused is defined as the number of times this labor code refused overtime.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 40**

A calendar record is defined at which level?

- A. Site
- B. Sets
- C. System
- D. Organization

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 41**

Where must a value be entered in the Domain application in order for a domain value to be organization-specific?

- A. In the Sitefield
- B. In the Domainfield
- C. In the Organization field
- D. In the Organization options

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 42**

Which record has one or more skill levels and premium pay codes?

- A. Craft
- B. Labor
- C. Owner Group

D. Person Group

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 43**

A company has a requirement to customize the Locations application and add a new button to open an external document repository. Once the document repository is a Web-based application, which standard process would achieve this requirement?

- A. create an interaction
- B. create a workflow process
- C. create a custom Javaclass
- D. create a Launch in Context

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 44**

Which statement about using attachments is true for communication templates?

- A. An option is to send a document folder as the attachment with the communication.
- B. When the communication template is created with attachments, the attachments are compressed for storage in the database as a blob.
- C. Communication templates can use substitution variables for the type of document to be sent so that an appropriate attachment is always selected.
- D. When multiple documents are attached to a communication template, they are compressed for sending by the workflow at the time of submission.

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 45**

A record must be defined at which level in order for it to be available for each user in any organization?

- A. SITE
- B. GLOBAL
- C. SYSTEM
- D. ORGANIZATION

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 46**

Which two statements are true about the Workflow Administration application? (Choose two.)

- A. It allows users to accept an assignment.
- B. It allows users to stop a workflow process.
- C. It allows users to start a workflow process.
- D. It allows users to delete a workflow process.
- E. It allows users to view or modify assignments.

**Correct Answer:** BE

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 47**

A automation script may contain one or more variables. Which option is a valid binding type?

- A. Field
- B. Column
- C. Attribute
- D. Application

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 48**

A report cannot show more than 200 records even if a query is generated that contains greater than 200 records. Which option restricts the output?

- A. Enable Limit Records and set a Max Record Limit value
- B. Enable Max Records and set an Upper Record Limit value
- C. Enable Restrict Records and set a Max Record Limit value
- D. Enable Record Controls and set an Upper Record Limit value

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 49**

What are two types of reports that can be registered in the Tivoli process automation engine? (Choose two.)

- A. BIRT
- B. SQR

- C. EXCEL
- D. QUEST
- E. COGNOS

**Correct Answer:** AE

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 50**

When setting up a Key Performance Indicator (KPI), it must be made available to everyone so they can use it on their Start Center. Which setting must be selected?

- A. Is Valid
- B. Is Open
- C. Is Public
- D. Is Enabled

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 51**

Which statement is true about appenders?

- A. If a logger is created, an appender cannot be created.
- B. One or more loggers can be associated with a specific or multiple appenders.
- C. One or more loggers cannot be associated with a specific or multiple appenders.
- D. Any appender has its own corresponding Tivoli process automation engine application.

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 52**

Which statement is an example of a replacement variable in a condition expression?

- A. &old\_<attrname>
- B. :owner.id = &user&
- C. location, description
- D. &owner&. jobplan.Priority

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 53**

Which statement is true about using the Database Configuration application?

- A. Online database configuration changes must be implemented in admin mode.
- B. An online database configuration change can be implemented without entering admin mode.
- C. An online database configuration change can be implemented from the command line mode.
- D. Online database configuration changes can be implemented from the command line mode while the user interface is in admin mode.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 54**

Which statement describes a function of the integrity checker?

- A. It validates database business object relationships.
- B. It looks for data inconsistencies and repairs them where possible.
- C. It compares the data dictionary with the underlying physical database schema.
- D. It examines the data contents of all database tables to check for missing or incomplete data.

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 55**

Conditional expression 1004 is changed, which is associated with the Assets application and the Locations application. The original conditional expression 1004 has a type value of 1 that is used to hide a field in these two applications. The type value is changed to 2 to show the field in the Locations application.

Which statement describes the result when the changed conditional expression is saved?

- A. The field shows in both applications
- B. The field remains hidden in both applications
- C. The field shows only in the Assets application
- D. The field shows only in the Locations application

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 56**

How are attached documents folders available in an application?

- A. From the application, click the Attachments icon
- B. From the application, select the Add Attached Documents action
- C. From the application, choose Select Action > Attachment Library/Folders> Add Folders
- D. From the application, choose Select Action > Attachment Library/Folders> Associate Folders

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 57**

Which cron tasks is included with Tivoli process automation engine V7.5?

- A. PMCronTask
- B. KPICronTask
- C. UserCronTask
- D. WorkOrderCronTask

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 58**

Which statement is true about the Console Appender?

- A. It writes log statements to the console.log file.
- B. It writes log statements to the maximo\_console.log file.
- C. It writes log statements to the Application Server Console.
- D. It writes log statements to the file specified in the File Name field of the Logging application.

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 59**

Which two methods can be used to specify that a record cannot be saved unless there is a value in a data field of an application? (Choose two.)

- A. in Database Configuration, set the Required flag to Yes for the data attribute
- B. use the Application Designer for the desired application and add the Required control
- C. create an Action linked to a crontask that checks if the appropriate data elements have a value
- D. in Organizations > Configuration Options> Define Required Fields, enter the application and field name for the required field
- E. in the Platform Configuration module> System Properties application, query for and enable the Required option for the appropriate data element(s)

**Correct Answer:** AB

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 60**

Where are system settings defined?

- A. Systems application
- B. System Settings application
- C. System Properties application
- D. Configuration Settings application

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 61**

How can a Java Virtual Machine's memory usage be monitored?

- A. generate GO dumps
- B. generate heap dumps
- C. generate thread dumps
- D. generate Java core dumps

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 62**

What does the Tivoli process automation engine use to define variables in a condition expression?

- A. colon(:)
- B. semi-colon (;)
- C. fixed length delimiters
- D. comma separated values (CSV)

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 63**

What does an active workflow process define?

- A. the flow of working Application Designer

- B. the process to add an attribute to an application
- C. the different work to be performed by the lead craft
- D. the different paths that a record can take as it moves through a business process

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 64**

How can the work being done by a Java Virtual Machine be viewed?

- A. generate a GO dump
- B. generate a heap dump
- C. generate a thread dump
- D. generate a process dump

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

<http://www.gratisexam.com/>

**QUESTION 65**

Where can messages be created that can be broadcast throughout the organization?

- A. KPI application
- B. User application
- C. Bulletin Board application
- D. Work Order Tracking application

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 66**

What is true about the Chart of Accounts application?

- A. It is a set-level application.
- B. It is a site-level application.
- C. It is an enterprise-level application.

D. It is an organization-level application.

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 67**

What is a person record?

- A. Record for a properties
- B. Record for an asset added on a work order
- C. Record for a job plan added to a safety plan
- D. Record for an individual whose name could appear as a text field value

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 68**

When creating limits and tolerances for a security group, which value option can be restricted in the default interlace?

- A. labor expenditure limit
- B. materials requisition limit
- C. budget limits (by organization)
- D. number of members of a security group

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 69**

What is one purpose of the security' select action item Authorize Group Reassignment?

- A. To approve security changes
- B. To enable the saved changes to a security group
- C. To authorize users to be able to remove users from security groups
- D. To remove all security groups from a given user in order to add new security groups

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 70**

Where are cron tasks created?

- A. Work application
- B. Logging application
- C. Systems application
- D. Cron Task Setup application

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 71**

When can a configuration record be added to a migration collection?

- A. if the migration object cannot migrate the data that is contained in the record
- B. if the migration collection that can migrate the data is contained in the business object
- C. if the record is supported by a migration object that can migrate the data contained in the record
- D. if the record is not supported by a migration object that can migrate the data contained in the record

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 72**

An admin user has created a new domain called EXTWOSTATUS and wants to include just this domain in the migration package. What must be done?

- A. create a Migration Group that includes the EXTWOSTATUS domain object and use it in the Migration Manager package
- B. create a Migration Object that includes the EXTWOSTATUS domain object and use it in the Migration Manager package
- C. use the Migration Object that contains the MAXDOMAIN objects and set the proper Where clause from the Migration Objects table level
- D. use the Migration Group(s) that contains the MAXDOMAIN objects and set the proper Where clause from the Migration Groups table level

**Correct Answer:** D

Explanation:

#### **QUESTION 74**

Which statement is true about Start Centers?

- A. Each security group can have an unlimited number of available Start Center templates associated with it.
- B. When there is more than one Start Center page available to a user, the system displays tabs for each page.
- C. The security privilege to add / modify Start Center templates is related to a User record and controlled through the Enable Start Center Maintenance check box.
- D. Start Centers can be designated as Dependent (the information from multiple State Centers is combined) or Independent, (meaning each template is displayed separately).

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### **QUESTION 75**

What is the purpose of the Display Settings icon located at the top of the Start Center page?

- A. It is used to define the font size and type of each text-based Start Center portlet.
- B. If a user has more than one Start Center page available they can select the page to open by default.
- C. On a KPI Graph portlet, Display Settings defines whether the selected [<P1 is shown as a gauge or as a bar chart.
- D. It is used to apply colors to rows in the Result Set portlet to highlight set points and implement user- defined standards.
